Overview

Overview

Elmar Home Care Ltd has been delivering compassionate and professional domiciliary care across West Yorkshire, North Yorkshire, and Lancashire since 1986. With services ranging from personal and respite care to Alzheimer's support, rehabilitation, and palliative care, Elmar has established itself as a trusted name in home-based health and social services.

Despite its reputation in care, Elmar's digital infrastructure was outdated. The business relied on a static HTML website and used WhatsApp for internal team communication, posing risks in data security, coordination, and efficiency.

It's good to live the life you want

Whether it's your mum or dad, aunt or uncle, a neighbour who's always cared for you or a partner who's stood by you, we're here so those who mean the most to you can live the life they want.

Extensive experience

Since 2004, we've helped people live life on their terms, in their homes. With 20+ years of learning from people like you, looking after your loved ones and constantly refining our Home Care service.

Quality you can count on

Every day, we aim to provide the best Home Care. We train our Care Experts, track your loved one's health, and keep you involved every step, ensuring our quality of care puts your mind at ease.

End-to-end care

Whether it's companionship for a few hours a week or complex 24/7 care, we meet all your Home Care needs. So if your loved one's situation changes, they won't have to change care providers too.

Care Services

The Challenge

The Challenge

A basic HTML/Bootstrap website with no CMS or dynamic content management.

Limited online visibility and outdated design that didn't reflect service quality.

Staff coordination relied on WhatsApp, leading to lack of control and privacy concerns.

No system for admin oversight of communications or call records.

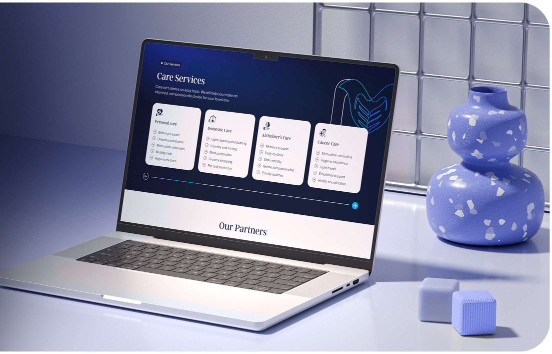
The Solution

The Solution

We delivered a robust, modern digital ecosystem tailored to both public-facing services and internal staff collaboration.

Website Redesign

- **Technology Stack:** React frontend, RESTful APIs, Node.js backend, MongoDB database.
- Fully responsive design matching modern accessibility and branding standards.
- Dynamic service listings with content managed via an integrated admin panel.
- **Features include:**
  - Care service overviews
  - DayCentre details
  - CQC integration
  - Office and contact management
  - SEO-optimized page structures



Our Services

Results

Results

Complete replacement of WhatsApp with a secure, controlled mobile app.

Improved communication flow and faster team coordination.

A refreshed online presence, leading to increased user trust and inquiries.

Secure storage and transmission of internal messages and call records.

Hear from our client

Hear from our client

Sebastien

Shipley

“My mother started developing the early stages of dementia when she started frequently repeating herself and forgetting things. Our family just put it down to old age, at first. When her symptoms got worse, we contacted Elmar.”

Angela

Keighley, Daughter

“Our father, in his old age, increasingly became more depressed, quiet and distant. When Elmar brought a pet dog to visit him, our father instantly became happier and livelier.”

Sarah Gedge

Daughter of Client

“The care we are receiving is really good staff are really friendly helpful and very caring they are very respectful and would Recommend your company “

Conclusion

With a redesigned, React-powered web platform and a secure staff communication app, Elmar Home Care is now digitally aligned with its professional reputation in care delivery. The solution not only enhances public perception but also empowers internal teams to collaborate securely and efficiently – proving that tech-enabled care is the future.
